DETAILED ACTION

1. This action is responsive to communications: Amendment, filed on 9/26/2008.

This action is non-final.

2. Claims 1-3 and 6-8 are pending in this application. Claims 1-3 are independent claims. This application is a 371 of PCT/IB04/02236 filed 7/2/2004, and United Kingdom application 0316168.4 filed 7/10/2003.

3. The present title of the invention is "Method of generating a map display for a graphical user interface" as filed originally.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing (Reference the May 15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Processes' under 35 U.S.C. 101"). The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claim 7 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A server can be software program. Software program per se is non-statutory.

Allowable Subject Matter

4. Claims 6 and 8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As per claim 6 or 8, the closest prior art by Yost does not explicitly disclose displaying a map highlighting a first area on the map surrounding a first position fix wherein the size of the area corresponds to the accuracy of the first position fix; and highlighting a second area on the map surrounding a second position fix wherein the size of the second area corresponds to the accuracy of the second position fix.

Response to Arguments

Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.
